Meet a "machine for all missions"

What 20th-century invention can help the deaf speak, date ancient jade, sell tickets to a rock concert, design a city, forecast the weather, schedule a sophomore's classes, and catalog all of the newspapers ever published in Iowa?

The computer, of course.

But none of this happens without human direction. And that's the reason Iowa State is raising \$10 million to build the Charles W. Durham Center for Computation and Communication—so that students, faculty, staff, researchers, and off-campus correspondents and colleagues can improve their computer literacy—not simply to "crunch" more numbers, but to think, using the computer as a tool.

Here are some of the ways the proposed facility will directly benefit the university and its many missions.

Students:

- Throw away the T-square; freshman engineers now use sophisticated computer graphics to solve design problems.
- So you're pulling an all-nighter. Computer access 24 hours a day could allow you to review the instructor's lecture notes via your dormitory-based micro-computer.

Teaching:

- Design a building, space shuttle or sculpture—and look at it in three dimensions before it is modeled.
- Run a farm, analyzing market data and making management decisions via computer.

Research:

- Save lives and property by stimulating the atmosphere and using the computer to forecast severe weather.
- Help the deaf to speak through Video Voice, a computer that visualizes sound.

These are only a few specific examples of how the Durham Center will aid in instructional and research programs.

More than \$6 million in gifts and pledges has been received for the Durham Center Campaign. But nearly \$4 million in gifts and commitments is needed to bring this vital project from plans to reality.

Your participation is needed at Iowa State. Help support this "engine" that drives research, academic innovation and applications yet to be imagined.

Help make the dream a reality.

ISN Modem Pool Instructions

Data Calls From Off-Campus Modems to the ISN Network Via Inbound Modems

Several modems are connected to the ISN to provide off-campus access to the network. You can place a data call to the ISN with a modem using one of the following phone numbers.

294-0300 (300 baud)
294-1200 (1200 baud)
294-2400 (2400 baud)

When the modems connect, press <RETURN> several times in quick succession until you get the **DIAL:** prompt. Then, enter the address you want to call (i.e., **CCVAX, EVAX, WYLBUR**, etc...) and press <RETURN>. You will then be connected to the dialed address and can login as usual. When you are finished with your session, follow appropriate logout procedures. After logging out, if **DISCONNECT** does not appear, then enter <BREAK> <BREAK> to disconnect from the host. The regular ISN modem will hangup at this time, ending the phone call, as well as your login session. To reconnect to the ISN, you will need to redial the modem pool, and repeat the above process.

Data Calls From the ISN Network to Off-Campus Modems Via Outbound Modems

Using the ISN outbound modem pool, it is possible to connect to off-campus systems reachable by modem. The ISN outbound modems are Hayes-compatible and support 300, 1200, and 2400 bps connections. Speed setting is done automatically; the same modems are used for 300, 1200, and 2400 bps connections. Additional features such as auto-reliable mode and data compression are activated automatically if the answering modem supports them. To use the outbound modems, type **MODEM** at the **DIAL:** prompt. When the ISN replies with **ANSWERED**, your terminal is connected to an outbound modem. Next, type **ATZ** to reset the modem to its "default" settings. After **OK** appears, you are ready to call out of the network.

To place a local call, type **ATDTphonenum** where **phonenum** is the number that you would call from an ON-CAMPUS phone. For example, **ATDT4????** would call ISU Extension 4-????, while **ATDT9232????** would call the off-campus number 232-???? (Question marks are used for example only. Replace them with the actual digits from the phone number you wish to dial.) The 9 prefix is needed to dial off-campus just as in a voice call.

To place a long distance call, you must use an authorization code; **you will be charged regular long distance toll rates for any long distance data calls placed.** (For information on how to obtain an authorization code, call the Telecommunications Office at 294-8585.) Placing long distance calls is similar to placing local calls, but you must also include your

authorization code. Example:

ATDT91555??????W1234567 would dial 9-1-555-????, and would use 1234567 as your authorization code. Note the "W"; it is necessary to tell the modem to wait for the dial tone before dialing your authorization code.

When the modem successfully connects to the remote system, **CONNECT <speed>** <mode> will be displayed, where <speed> is the bps rate the modems are connected at, and <mode> indicates what special features have been activated, such as **RELIABLE** or **COMPRESSED**. You may have to press <RETURN> a few times to get a login prompt; login as usual at this time. Once you have completed your session and have logged off, hang up the modem by typing your disconnect sequence (usually <BREAK> <BREAK>). This will end the phone call and disconnect you from the modem.

For further information concerning how to log into ISU computer systems connected to the ISN, please refer to the Computation Center's Users' Reference Memo **URM039** available from the Computation Center Library, 108 Atanasoff Hall.

Switchhook

The switchhook is the set of buttons where the handset rests when not in use (see below). When the instructions say to "press the switchhook" you should press one of the buttons momentarily and then release.

Note: Pressing the switchhook firmly once and then releasing it puts your current call on hold. Please make sure that when terminating a call, you hold the button down for several seconds, or simply hang up the phone. **A call inadvertently placed on hold may remain on hold for several hours. This is especially important to remember on long distance calls.**

Originating Calls

To originate campus calls:

Dial last five digits of phone number (i.e. 6-XXXX or 4-XXXX).

To originate local area calls:

Dial 9 plus the number.

To originate long distance calls from unrestricted telephones (any call outside the Ames/Gilbert area):

Dial 9 + 1 + area code (if not 515) + 7-digit number.

If call does not go through, you may hear recall dial tone.

1. Dial 1.
2. Listen for confirmation tone.
3. Hang up within four seconds and the call goes into queue.
4. When a line becomes available, your phone will ring with three short rings.
5. Lift receiver and your call will automatically go through without redialing.

To originate long distance calls using authorization codes:

1. Dial 9 + 1 + area code (if not 515) + 7-digit number.

2. Listen for recall dial tone.

3. Enter authorization code.

If call does not go through, you may hear confirmation tone.

1. Hang up within four seconds and call goes into queue.
2. When a line becomes available your phone will ring with three short rings.
3. Lift receiver and your call will automatically go through without redialing.

Note: If there is not room in the queue, you will hear a fast busy. You should hang up and try your call later.

Note: Please be aware that on the university system, you will be charged for unanswered long distance calls if you allow the phone to ring more than six times or if you do not hang up promptly upon hearing a busy signal.

Note: ISU uses Direct Dial and International Direct Dial rates, updated quarterly. Direct Dial calls are discounted. International Direct Dial calls are not discounted.

To originate long distance collect calls:

1. Dial 9 + 0 + area code (if not 515) + 7-digit number.
2. Tell operator you are placing a collect call.

Note: Collect calls cannot be received on the university system.

International Dialing:

Dial:

1. 9
 2. 011 (international access code)
 3. Country code
 4. City code
 5. Local number
 6. Either wait 10 seconds or dial # for call to be put through.
 7. Authorization code users—listen for recall dial tone and then enter code.
- (For country and city codes, see page 8 of the *ISU Directory*.)

Calling Cards

To obtain an AT&T calling card application, contact the Telecommunications Office.

To originate long distance calls using a calling card:

1. Dial 9 + 0 + area code (if not 515) + 7-digit number.
2. Wait for tone.
3. Enter your calling card number.
4. To place more than one call, after first call dial # and new number.

To originate calling card calls from outside the U.S.:

Use the INTERNATIONAL card number when calling back to the U.S. from a foreign country honoring the card. The International Operator (9-011) can tell you if the country honors the calling card. All such calls will be billed in U.S. currency at U.S. rates.

To place a call on hold:

1. Ask party to hold.
2. Depress switchhook momentarily.
3. Listen for recall tone.
4. **Do not hang up.**
5. To reconnect line depress switchhook again.

To hold and consult:

1. Ask party to hold.
2. Depress switchhook momentarily.
3. Listen for recall tone.
4. Dial second party.

After second party hangs up, first party will automatically be reconnected.

To transfer to another campus extension:

1. Ask party to hold.
2. Depress switchhook momentarily.
3. Listen for recall tone.
4. Dial extension number.
5. Announce call.
6. Hang up.

Three-party conference call:

3. Listen for dial tone.
4. Dial busy extension number.
5. Listen for confirmation tone.
6. Hang up and wait for three short rings.

Calls may be placed and received during callback period. Callback automatically cancels if:

1. you do not answer within 20 seconds, or
2. your line or the extension line is busy for approximately 30 minutes.

Only one callback is permitted at a time.

To cancel callback:

1. Listen for dial tone.
2. Dial #5.
3. Listen for confirmation tone.
4. Hang up.

Call Waiting

One fast beep alerts you that you have another call when you are on the line. There are two ways to answer a waiting call:

1. a. Hang up.
b. Listen for alerting signal.
c. Answer the call.
2. a. Ask first party to hold.
b. Depress switchhook momentarily.
c. Listen for recall tone.
d. Dial *4.
e. To return to first party repeat steps (a) through (d). These steps can be repeated to switch between calls.
f. After you are done talking to one caller, hang up and wait for your phone to ring. When you answer, you will be connected to the other caller.
3. If you do not wish to answer the waiting call, ignore it.

If you choose not to answer the waiting call, remember the caller hears ringing, not a busy signal.

Note: The ISU system recognizes the * and # from touchtone telephones only.

Temporary Data Protection

When using your phone with a modem for data calls, activate Temporary Data Protection to prevent Call Waiting or other intermittent tones from interrupting your data connection.

1. Listen for dial tone.
2. Dial 113.
3. Listen for dial tone.
4. Dial number as usual.

Data protection is on a per-call basis and will end when the call is terminated. You will need to re-enter it for every data call.

Fraudulent Billing Can Lead to Prosecution

It is illegal for a person to charge long distance calls to another person's authorization code or calling card without permission. Persons placing such calls to avoid payment for service are subject to prosecution and if convicted are subject to imprisonment and/or a fine.

It is a crime under both state and federal law for anyone to make obscene or harassing telephone calls. These laws have penalties of imprisonment and/or a fine.

You will be billed from the Accounts Receivable Office for your basic service and long distance calls. (Only one resident in each single unit will be billed for basic service.) The Telecommunications call detail statement will be mailed to you monthly. Please make your

payment from the **Accounts Receivable** bill, and return your payment to the Treasurer's Office, 122 Beardshear. **To ensure correct application of your payment, please indicate the amount which is to be applied to your Telecommunications charges.**

To avoid loss of service, bills must be paid monthly. The initial reconnection charge (non-refundable) is \$25. Each subsequent reconnect charge will be \$50.

Note: You will be charged for unanswered long distance calls if you allow the phone to ring more than six times or if you do not hang up promptly upon hearing a busy signal.

If you lose your authorization code slip, contact the Telecommunications Office **immediately!** **You are responsible for all calls charged to your authorization code. Do not give this information to anyone else.** We strongly recommend that you memorize your code and then destroy the authorization code slip.

How to use this chart:

The bold number following the country name is the "Country Code."

Bold numbers beside cities are "City Codes."

The number to the left of the country name is the approximate time difference (TD) from Central Standard Time.

Military bases cannot be dialed directly.

*City codes not required.

**All codes in the Paris area are 1 + 8 digits.
The first of the 8 digits will begin with 3, 4, or 6.

Special American Express® Card Application for Undergraduates

Apply today for all the advantages of Cardmembership.

Once you acquire it, you'll see why the American Express® Card is the best card for you to carry right now—how it can help you run your life more smoothly as you begin another busy school year. For example:

- The Card makes it more convenient to cash a check or rent a videotape
- The Card makes it easier to shop for your personal needs—in the stores or through your favorite catalogs
- The Card gives you an opportunity to start building good credit now

- The Card helps you handle the unexpected with ease
- The Card gives you 24-hour access to knowledgeable and helpful Customer Service representatives
- The Card helps you pay for air and train tickets when you travel

And that's just the start of the benefits you'll enjoy when you become a Cardmember. Remember, with Automatic Approval, you can qualify for the Card now, while you're still in school. So don't wait. Apply today.

Notice to Married Wisconsin Residents: If you are a party to any marital property agreement, unilateral statement, or court decree under Wisconsin's Marital Property Act, the terms of that agreement will not affect our rights with respect to your American Express® Card account unless you provide us now with a copy of the agreement, or give us now complete information about the agreement.

Attention: Late payment fee: If an amount is past due for two billing cycles, a late payment fee of the greater of \$15 or 2½% of all past due amounts will be added. If an amount is past due for three or more billing cycles, a late payment fee of the greater of \$12 or 2½% of all past due amounts will be added. For MA and WI residents, if an amount is past due for three or more billing cycles, 1½% or 1%, respectively, of all amounts past due for at least two billing cycles is added. Different rules apply for LA, ND, PR and TX accounts.

Returned payment charge: \$15 (\$10 in IL, NY and WI) except as provided by applicable law. Cash advance fee: \$1.50 per transaction. Sign & Travel® Account Disclosures*: Annual percentage rate: 18%. Grace period: None, unless the full new balance is paid and no new charges are posted by the due date. There is no additional annual fee for the Sign & Travel Account, and no other fees or charges are associated with the use of the Sign & Travel Account.

*The Sign & Travel® Account is a benefit of Cardmembership which allows you to extend payment on certain travel related charges.

Residents of Illinois may contact the Illinois Commissioner of Banks and Trust Companies for comparative information on interest rates, charges, fees and grace periods. Call 800-634-5452, or write to CIP, P.O. Box 10181, Springfield, IL 62791.

Meet a "machine for all missions"

What 20th-century invention can help the deaf speak, date ancient jade, sell tickets to a rock concert, design a city, forecast the weather, schedule a sophomore's classes, and catalog all of the newspapers ever published in Iowa?

The computer, of course.

But none of this happens without human direction. And that's the reason Iowa State is raising \$10 million to build the Charles W. Durham Center for Computation and Communication—so that students, faculty, staff, researchers, and off-campus correspondents and colleagues can improve their computer literacy—not simply to "crunch" more numbers, but to think, using the computer as a tool.

Here are some of the ways the proposed facility will directly benefit the university and its many missions.

Students:

- Throw away the T-square; freshman engineers now use sophisticated computer graphics to solve design problems.
- So you're pulling an all-nighter. Computer access 24 hours a day could allow you to review the instructor's lecture notes via your dormitory-based micro-computer.

Teaching:

- Design a building, space shuttle or sculpture—and look at it in three dimensions before it is modeled.
- Run a farm, analyzing market data and making management decisions via computer.

Research:

- Save lives and property by stimulating the atmosphere and using the computer to forecast severe weather.
- Help the deaf to speak through Video Voice, a computer that visualizes sound.

These are only a few specific examples of how the Durham Center will aid in instructional and research programs.

More than \$6 million in gifts and pledges has been received for the Durham Center Campaign. But nearly \$4 million in gifts and commitments is needed to bring this vital project from plans to reality.

Your participation is needed at Iowa State. Help support this "engine" that drives research, academic innovation and applications yet to be imagined.

Help make the dream a reality.
